1.

Level: 1
Type: Implementation
Avg Duration: 1 Hrs

Problem Statement :-

You have been appointed as senior developer in Tata's R&D department. The engineers there are lazy, they don't want to do everything from scratch whenever they create a new model. They expect you to help them create an inheritance model for the automobiles.

Description :-

Implement an inheritance model for four wheeler automobiles.
Implement using both object.create() and constructor functions().
Think of properties of what can be inherited.

2.

Create your custom map method (myMap), which will work exactly similar to Array.map().
Create your custom forEach method (myForEach), which will work exactly similar to Array.forEach().
Create your custom filter method (myFilter), which will work exactly similar to Array.filter().
Create your custom reduce method (myReduce), which will work exactly similar to
